Reviewer's report

Title: Focal bone lesions in HIV-positive patient treated with tenofovir

Version: 2
Date: 6 November 2013

Reviewer: Vicente Boix

Reviewer's report:

the authors have a patient undiagnosed and the tenofovir causal relationship is only a suspect without sufficient support. More proofs are needed before publishing

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
