Reviewer’s report

Title: A portrait of single and multiple HPV-type infections in Brazilian women of different age strata with squamous or glandular cervical lesions

Version: 3 Date: 11 February 2014

Reviewer: Alyssa Cornall

Reviewer’s report:

I am satisfied with the changes that the authors have made to this manuscript.

Minor comments:
For the description of Figure 4, in the sentence “Although the majority of CIN2 or worse were associated with hr-HPV, six cases (p=1) were associated with lr-HPV types only.” Please remove the p-value as it is not used appropriately here.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
