Reviewer’s report

Title: Seroepidemiology of Toxocara canis infection among primary schoolchildren in the capital area of the Republic of the Marshall Islands

Version: 2 Date: 30 January 2014

Reviewer: Thokozani Hove

Reviewer’s report:

Minor Essential Revisions:
They have to do with the language

Discretionary Revisions:
1. Name some those closely related round worms of man that could cross react with Toxocara canis
2. Consider to include under the conclusions in the last part of discussion awareness on the part of the parents the importance of the control of infection in the dog as part of the preventative measures

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
