Reviewer's report

Title: Re-Thinking The Perception Of Hepatitis B Virus Infection Risk In Asian Immigrants To The U.S.: A Prevalence Study On Hepatitis B Virus Infection Among First Generation Korean Immigrants In The Southern California Inland Empire.

Version: 1 Date: 25 March 2014

Reviewer: Heng Chi

Reviewer's report:

- Major Compulsory Revisions

1) Introduction section is too long. Please cut down by at least 50%.

2) The paper has major formulation issues. Many sentences are not clear.

3) The aim of the study is vaguely formulated. It might be interesting to make a figure of the percentage of infected, immune, susceptible individuals.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
