Reviewer's report

Title: High co-occurrence of anorectal chlamydia with urogenital chlamydia in women visiting an STI clinic revealed by routine universal testing in an observational study; a recommendation towards a better anorectal chlamydia control in women.

Version: 4  Date: 19 April 2014

Reviewer: Marjan Javanbakht

Reviewer's report:

No recommended revisions. The authors have sufficiently addressed revisions from the prior review.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
