Reviewer’s report

Title: Evolving epidemiology and antimicrobial resistance in spontaneous bacterial peritonitis: a two-year observational study

Version: 2 Date: 17 March 2014

Reviewer: Jun Yong Park

Reviewer’s report:

I would like to thank the authors for the opportunity to review their manuscript. I think this is an important paper and provides a very good addition to recently changing epidemiological and microbiological data. If added, I would like the authors to analyze and describe the effect of Multi(drug) resistant SBP a little more.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.
