Reviewer’s report

Title: Cost Effectiveness of a pentavalent rotavirus vaccine in Oman

Version: 1 Date: 23 April 2014

Reviewer: Martina Prelog

Reviewer’s report:

This is a very well designed and well written paper on cost-effectiveness of pentavalent rotavirus vaccine in Oman. This topic is very important to decrease the burden of disease and mortality rates due to rotavirus infection in children below 5 years in Oman and worth to be published.

- Major Compulsory Revisions
  None.

- Minor Essential Revisions
  Authors should discuss the differences of the recent study and the study by AL Awaidy et al. It is not clear for the reader why different outcomes are seen between the studies.
  Authors should reference a recent paper from Austria (Zlamy M et al, 2013, BMC Infect Dis) discussing the reduction of direct costs of universal mass vaccination.

- Discretionary Revisions
  Typing error: page 13, line 241: "i" on

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
