Reviewer’s report

Title: The impact of home-based HIV counseling and testing on care-seeking and incidence of common infectious disease syndromes in rural western Kenya

Version: 2 Date: 21 May 2014

Reviewer: Reshma Naik

Reviewer’s report:
This manuscript is very much improved from previous versions. It is much easier to follow and makes a clear point about the relevance of the study. Overall, the authors have done an excellent job of addressing reviewer comments and strengthening the paper.
My comments/suggested edits on this version are quite minor and generally editorial in nature to help improve the flow or clarity of some sections. Most can be made at the authors’ discretion.
See edits in track changes in the attached Word document. Note that I accepted all of the authors’ tracked changes and added in my own.

Major compulsory revisions:
None

Minor essential revisions:
See attached document

Discretionary revisions:
See attached document

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
