Reviewer's report

Title: Evaluation of a microcolony growth monitoring method for the rapid determination of ethambutol resistance in Mycobacterium tuberculosis.

Version: 1  Date: 27 March 2014

Reviewer: Ahmet Yilmaz Coban

Reviewer's report:

Materials and methods is not clear, it is confusion. If it should be rewritten and added any photo for explanation, it would be better understood. In addition it should added other important antituberculouse agents including rifampicin and isoniazid to the study.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
