Reviewer's report

Title: Agreement between QuantiFERON(R)-TB Gold In-Tube and the tuberculin skin test and predictors of positive test results in Warao Amerindian pediatric tuberculosis contacts

Version: 2 Date: 12 May 2014

Reviewer: Lisa Nelson

Reviewer's report:

General recommendation: this is an article of limited interest with a relatively small sample size (due to the sample of the population of interest). However, the authors have done a very thorough job of responding to reviewers’ comments and therefore the manuscript is much clearer and conclusions significantly strengthened.
