Reviewer’s report

Title: Evaluation of Capilia TB-Neo for culture confirmation of Mycobacterium tuberculosis complex

Version: 3  Date: 4 November 2013

Reviewer: Sarman Singh

Reviewer’s report:

This observational study carried out to evaluate a newly introduced commercial kit is very straightforward. The new kit was compared with old commercial kits and showed improved results and identifying additional strains as MTB and there is definite improvement in the sensitivity. The manuscript is well prepared and concise.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
