Reviewer’s report

**Title:** Determinants for hospitalization among low risk community acquired pneumonia.

**Authors:**

Dr Zakari Y Aliyu (zyaliyu@cs.com)  
Muktar H Aliyu (mhaliyu@yahoo.com)  
Ken McCormick (kmccormick@stagnes.org)

**Version:** 4  **Date:** 24 Nov 2002

**Reviewer:** Dr Tom Marrie

**Level of interest:** A paper whose findings are important to those with closely related research interests

**Advice on publication:** Accept without revision

This is an interesting paper which suggests that even in a young low risk population the pneumonia severity score by Fine et al is not the only factor that is considered when making the decision of who to admit to hospital for treatment of CAP
