Reviewer's report

Title: Common variable immunodeficiency syndrome with right aortic arch; a case report

Version: 2 Date: 20 October 2003

Reviewer: Kazunaga Agematsu

Reviewer's report:

General
Common variable immunodeficiency syndrome with right aortic arch is surely not reported. However, there may be no relationship between the onset of CVID and right aortic arch.

Discretionary Revisions (which the author can choose to ignore)
1. Because there are not a presentation thesis and certification, I think that there is not causality of CVID and right aortic arch. Thus, please remove the sentence that it can be associated with cardiovascular anomalies in abstract and discussion.

Minor Compulsory Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

What next?: Accept after discretionary revisions

Level of interest: An article of limited interest

Quality of written English: Acceptable
