Reviewer's report

Title: Visceral Leishmaniasis owing to Leishmania infantum (L. chagasi) in a patient residing in Argentina. What is the origin of the infection?; Case Report.

Version: 1 Date: 6 May 2004

Reviewer: Montserrat Gállego

Reviewer's report:

In the article is well described case of visceral leishmaniasis that can be used for educational purposes, as a necessary reminder of an important clinical lesson. The article points the necessity of the knowledge of cryptic cases of visceral leishmaniasis and the possibility in developing the disease in areas where the disease doesn’t exist. For this reason the article is considered of importance in its field.

It is also clear and well writing.
