Reviewer's report

Title: Mechanisms of Escape Phenomenon of Spinal Cord and Brainstem in Human Rabies

Version: 2 Date: 21 October 2005

Reviewer: Bernhard Dietzschold

Reviewer's report:

General
The authors responded satisfactory to the previous critique. In particular, the inclusion of figures showing the immunohistological data as well the morphometric analysis of the data has significantly improved the quality of this paper.

-----------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

-----------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
