Reviewer's report

Title: High frequency of Human Cytomegalovirus DNA in the Liver of Infants with Extrahepatic Neonatal Cholestasis.

Version: 3 Date: 10 October 2005

Reviewer: GIOVANNI NIGRO

Reviewer's report:

General

The paper has been much improved ---------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Page 3, line 16: this sentence needs corrections (probably "Hepatic involvement is frequent AND clinical evidence of hepatitis IS occasionally found")
Table 4: explain which are the words indicated by the initials NR
Figure 1 is doubled

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
