Reviewer's report

Title: Outcome of infections due to pandrug-resistant (PDR) Gram-negative bacteria

Version: 3 Date: 4 April 2005

Reviewer: Anna S Levin

Reviewer's report:

General
The authors improved the manuscript and addressed all the issues in a satisfactory manner.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

The authors addressed all the points made in the previous review.

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

The doses of colistin in Table 1 are expressed in Billions of units. this must be a mistake as usually Millions of units are used!

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
