Reviewer's report

Title: High frequency of Fredrickson's phenotypes IV and IIb in Brazilians infected by human immunodeficiency virus.

Version: 3 Date: 18 May 2005

Reviewer: Bruno B Caramelli

Reviewer's report:

All original criticisms have been answered. The authors have answered my points sufficiently well to allow their manuscript to be published.

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
