Reviewer's report

Title: High frequency of Fredrickson's phenotypes IV and IIb in Brazilians infected by human immunodeficiency virus.

Version: 3 Date: 20 May 2005

Reviewer: Georg Behrens

Reviewer's report:

General

No further comments. The author have addressed in the revised version all the issues that have been raised initially.

-----------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
