Reviewer's report

Title: Insufficient neutralization in testing a chlorhexidine-containing ethanol-based hand rub can result in a false positive efficacy assessment

Version: 3 Date: 13 June 2005

Reviewer: manfred rotter

Reviewer's report:

General

-------------------------------------------------------------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
The authors have followed the suggestions of the reviewer.
-------------------------------------------------------------------------------------------------
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
The suggested five minor revisions have been done.
-------------------------------------------------------------------------------------------------
Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
