Reviewer’s report

**Title:** Rapid and Simultaneous Detection of Human Hepatitis B Virus and Hepatitis C Virus Antibodies Based on a Protein Chip Assay Using Nano-gold Immunological Amplification and Silver Staining Method

**Version:** 3  **Date:** 18 April 2005

**Reviewer:** Oscar Octavio Noya

**Reviewer’s report:**

General

I recommend the publication of this interesting article, since the observations made previously were corrected.

 Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

They were satisfactorily explained and corrected

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

They were corrected

Discretionary Revisions (which the author can choose to ignore)

No additional comments

**What next?:** Accept without revision

**Level of interest:** An article of outstanding merit and interest in its field

**Quality of written English:** Acceptable

**Statistical review:** No
