Reviewer’s report

Title: Subclinical iron deficiency is a strong predictor of bacterial vaginosis in early pregnancy

Version: 2 Date: 6 June 2005

Reviewer: Phillip Hay

Reviewer’s report:

General
The modifications to the manuscript have addressed my previous comments appropriately.

--------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

--------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

--------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
