Reviewer’s report

Title: Lemierres syndrome and genetic polymorphisms : Case Report

Version: 4 Date: 15 May 2006

Reviewer: Steven Opal

Reviewer’s report:

General

-------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
none

-------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

There are a number of typos that need to be corrected: PNN's should be PMN's; Fc GR11 should be Fc gamma R11; SPD should be surfactant not surfdactant; homozygosis should be homozygous.

-------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

English grammar needs some revisions

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No
