Reviewer's report

Title: Female genital schistosomiasis as an evidence of a neglected cause for reproductive ill-health: A retrospective histopathological study from Tanzania.

Version: 2 Date: 27 June 2006
Reviewer: Birgitte Jyding Vennervald

Reviewer's report:

General
The authors have revised the manuscript in a satisfactory way taking the comments from the reviewers into consideration.

=================================================================================
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
No

=================================================================================
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

=================================================================================
Discretionary Revisions (which the author can choose to ignore)
Page 9 line 7: change to: "... severe schistosomiasis only"

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
