Reviewer's report

Title: Systemic Inflammatory Response Syndrome in Adult Patients with Nosocomial Bloodstream Infections due to Enterococci

Version: 2 Date: 28 August 2006

Reviewer: William E Trick

Reviewer's report:

General
The authors have provided satisfactory replies to my initial review and I have no further recommendations for revision.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
