Reviewer's report

Title: Leishmania infantum leishmaniasis in corticosteroid - treated patients.

Version: 2 Date: 4 July 2006

Reviewer: Hiro Goto

Reviewer's report:

General
Questions raised were fully clarified and clinico-epidemiological data that are important for the diagnosis were stressed in the revised version. In my opinion, it is an important report for clinicians in the endemic area for leishmaniasis.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
