Reviewer's report

Title: Epidemiological Trends in Nosocomial Candidemia in Intensive Care Unit (ICU) in Italy

Version: 3 Date: 7 December 2005
Reviewer: Hsiu-Jung Lo

Reviewer's report:

General
It is wonderful to have the frequencies and descriptives of demographic and clinical characteristics of the patient population in the text and the table 1. However, it would be more informative to investigate the prevalence of different species among the characteristics of patients.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
It is wonderful to have the frequencies and descriptives of demographic and clinical characteristics of the patient population in the text and the table 1. However, it would be more informative to investigate the prevalence of different species among the characteristics of patients.

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
