Reviewer’s report

Title: Patterns of sexually transmitted infections in adolescents and youths in Dar es Salaam, Tanzania

Version: 6 Date: 8 December 2005

Reviewer: Roger Detels

Reviewer’s report:

Item 1 (in response from Dr. Urassa): The information should be provided in the manuscript. It is not appropriate to include males and females in the same table since the two significant differences appear to be in the females.

Item 2: The authors have now made it clear that estimates by the patients were used.

Item 3: OK

Item 6: It appears that the offending statement has been removed from the manuscript.

Item 7: The revised statement is adequate.
