Reviewer's report

Title: A retrospective study of central nervous system shunt infections diagnosed in a university hospital during a 4-year period

Version: 4 Date: 16 December 2005

Reviewer: Amitabha Mitra

Reviewer's report:

General

We feel this paper is ready for publication with no further revisions.

------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
