Reviewer's report

Title: Occurrence of invasive pneumococcal disease and number of excess cases due to influenza

Version: 2 Date: 28 December 2005

Reviewer: AJ Valleron

Reviewer's report:

General
In its present form, this is an interesting epidemiological paper who will interest people from other disciplines (than epidemiology)

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None. All previous remarks were answered.

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
None. All previous remarks were answered.

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
