Reviewer's report

Title: Diagnostic and prognostic accuracy of clinical and laboratory parameters in community-acquired pneumonia

Version: 2 Date: 22 January 2007

Reviewer: Vicente Ausina

Reviewer's report:

General
The authors have correctly addressed the comments of the reviewer.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
The names of microorganisms are not always in italics.

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
