Reviewer's report

Title: Vaccination with Hemagglutinin or Neuraminidase DNA Protects BALB/c Mice against Influenza Virus Infection in Presence of Maternal Antibody

Version: 3  Date: 4 June 2007

Reviewer: Zichria Zakay-Rones

Reviewer's report:

General The authors have answered all my questions to my satisfaction and also inserted some minor corrections that I have asked for. However I think the answer to the no. of mice used ans no. of repetition should be inserted into the ms. it may be of interest to the reader as it was to me, even more so from the answers to the other reviewers all felt that this information is missing, but I leave it for the editor to decide. The Ms. can be published now---------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

---------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

---------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

---------------------------------------------------------------

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
