Reviewer's report

Title: Effectiveness of DNA-recombinant anti-hepatitis B vaccines in blood donors: a cohort study.

Version: 3 Date: 26 September 2007

Reviewer: Fransisco Souto

Reviewer's report:

General
I consider that the authors have answered the queries properly.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None.

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
I have noticed that the term "HBsAg" has appeared in the text in a wrong graphy "HbsAg". Conventionally, the "B" of this term should be appeared as a cap.

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
I declare that I have no competing interests.
