Reviewer’s report

Title: Interpreting Cerebrospinal Fluid Pleocytosis in HIV in the Era of Potent Antiretroviral Therapy

Version: 2 Date: 20 April 2007

Reviewer: Hans-Jürgen Stellbrink

Reviewer’s report:

The authors have addressed the issues raised in the first review in a satisfactory manner. It is now clarified that no patient had signs or symptoms of diseases that might bias the findings. The statement in the discussion addresses this issue, as well. I would recommend to accept the manuscript for publication without further changes.

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
