Reviewer's report

Title: Predictive factors of virological success to salvage regimens in HIV-1 infected children

Version: 4 Date: 7 May 2007

Reviewer: Mona Loutfy

Reviewer's report:

General - much improved

--------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached) - none

--------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)- none

--------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)-
Still some grammar and spelling mistakes:
- Background - line 3 - through instead of trough
- Results - page 8, last paragraph: no association instead of not association
Table 2 - only 2 decimals after . for OR; would also do same for all p-values in text

--------------------------------------------------------------------------------------------------------------------------

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
