Reviewer’s report

Title: Higher pre-infection vitamin E levels are associated with higher mortality in HIV-1-infected Kenyan women: a prospective study

Version: 3 Date: 15 May 2007

Reviewer: Philip Diaz

Reviewer’s report:

have reviewed the revised manuscript and the authors response to concerns/critiques raised previously. I believe the authors have answered the previous concerns, that the manuscript is an important contribution to the literature and that it is suitable for publication. I know of no evidence of scientific misconduct.
