Reviewer’s report

Title: Serological disease status of Pakistani population infected with Hepatitis B

Version: 4 Date: 23 May 2007

Reviewer: Divina Cardoso

Reviewer’s report:

The authors of the manuscript “Serology based disease status of Pakistani population infected with Hepatitis B virus infection” attended the suggestions and I consider that it can be published. On the other hand I suggest that the word "infection" after "Hepatitis B virus" must to be retraied.

-----------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
