Reviewer’s report

Title: The United States and Canada as a coupled epidemiological system: an example from hepatitis A

Version: 3 Date: 16 November 2007

Reviewer: Philip Rosenthal

Reviewer’s report:

General
Adequate response to the queries.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
I have no competing interests
