Reviewer's report

Title: Basis for treatment of tuberculosis among HIV-infected patients in Tanzania: the role of chest x-ray and sputum culture

Version: 3 Date: 8 January 2008

Reviewer: Stephen Lawn

Reviewer's report:

The authors have substantially amended the paper and it now reads well. The data are now presented appropriately within the context of the limitations highlighted. I think it is now a useful contribution to the field.

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
