Reviewer's report

Title: Private doctors' practices, knowledge, and attitude to reporting of communicable diseases: A national survey in Taiwan

Version: 3 Date: 2 December 2008

Reviewer: Mark Ferson

Reviewer's report:

I am happy with the manuscript in its revised form, which is greatly improved from the version first submitted.

If possible, some light editing for English usage would be appropriate but apart from this, I believe that the paper is suitable to be published in BMC Infectious Diseases.
