Reviewer's report

Title: Methicillin-resistant Staphylococcus aureus and Acinetobacter baumannii on computer interface surfaces of hospital wards and association with clinical infections

Version: 1 Date: 24 February 2009

Reviewer: Aaron M Bruce

Reviewer's report:

Discretionary
Line 1, grammar, "Computer keyboards and mice are potential reservoirs for nosocomial pathogens;"

Line 4-5, wording
" the impact of these potential sources of contamination on clinical infection needs to be clarified"

Background
line 1, " In developed countries, computers are used...."

Pg 12 2nd paragraph, 1st line. " Studies in ICU's indicate a more important role "

Pg 14 last sentence " hygiene should be paid to the keyboard"

Rates of before hand washing training would be very interesting if available.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
