Reviewer's report

Title: Impact of infection control activities on the rate of Needle Stick Injuries at a tertiary care hospital over a period of six years: an interventional prospective study from Pakistan

Version: 1 Date: 2 March 2009

Reviewer: alpay azap

Reviewer's report:

The details of the "education programmes" should be detailed and whether all the healthcare workers attended to these programmes should be detailed i.e. Percentage of the "educated" staff for each group.
The meaning of "CI" in Table 1 should be clarified.
The meaning of "p values" in Table 2 should be clarified.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
