Reviewer's report

**Title:** Assessment of anti-inflammatory tumor treatment efficacy by longitudinal monitoring employing sonographic micro morphology in a preclinical mouse model.

**Version:** 3 **Date:** 27 May 2011

**Reviewer:** James Lacefield

**Reviewer's report:**

The authors have satisfactorily addressed the suggestions in the previous review. The addition of the immunohistochemistry findings in particular helped to strengthen the paper. No further revisions are needed.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I have received in-kind research support from VisualSonics, Inc., the manufacturer of the ultrasound system used in this study.
