Reviewer's report

Title: Comparison of Contrast in Brightness Mode and Strain Ultrasonography of Glial Brain Tumours

Version: 2 Date: 26 March 2012

Reviewer: Jingfeng Jiang

Reviewer's report:

General comment

The authors have addressed most of my comments from the previous run. The quality of this manuscript could be further enhanced if intra- and inter-observer variability is included to see whether or not their results are sensitive to selection of these measurement sites.

Minor Essential Revisions

The authors should at least discuss how the measurements might be affected without standardized "reading" or their planned effort to address this issue.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
