Reviewer’s report

Title: Acute pulmonary embolism in the era of multi-detector CT: a reality in sub-Saharan Africa.

Version: 4 Date: 22 July 2012

Reviewer: John W Nance

Reviewer’s report:

Overall, the revisions are acceptable and in accordance with original suggestions.

The ordering of the manuscript is still not in accordance with BMC Medical Imaging’s guidelines, but I assume this can be easily taken care of during copyediting.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests
