Reviewer's report

**Title:** A novel study of Copy Number Variations in Hirschsprung disease using Multiple Ligation-dependent Probe Amplification (MLPA) technique.

**Version:** 2  **Date:** 5 September 2009

**Reviewer:** Alessio Pini Prato

**Reviewer's report:**

The Authors dealt properly with the concerns raised by the reviewer. The major issues have been dealt properly and the paper is now suitable for publication on the Journal. Nonetheless, I want to underline that this paper remains of limited interest for those who are nor strictly interested on this research field.

**Level of interest:** An article of limited interest

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
