Reviewer's report

**Title:** A novel c.-22T>C mutation in GALK1 promoter is associated with elevated galactokinase phenotype

**Version:** 4  **Date:** 28 January 2009

**Reviewer:** Richard Reece

**Reviewer's report:**

The revised manuscript by Park et al is a considerable improvement over the original.

I have just one minor point which needs to be corrected and this is listed below.

1. The labelling of the x-axis in Fig. 4B is confusing. Presumably a single competitor has been used and therefore the word 'competitors' should be modified.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests.
