Reviewer's report

Title: Mitochondrial DNA haplogroup T is associated with coronary artery disease and diabetic retinopathy: a case control study

Version: 2 Date: 6 March 2009

Reviewer: Tomomi Fujisawa

Reviewer's report:

I found the manuscript revised properly.
I feel the manuscript can be accepted in the present form.
If authors agree, however, I would like add the following comments:

#2 One sentence would be added in the text regarding the similar HG distribution on between the two areas, Salzburg and Graz.

#11 As for the HGT with severity of retinopathy, the authors may add one sentence in the text.
