Reviewer’s report

Title: Genetic Variation in Fcgamma Receptor IIa and Risk of Coronary Heart Disease: Negative Results From Two Large Independent Populations.

Version: 1 Date: 30 September 2008

Reviewer: Andreas Jönsen

Reviewer’s report:

Major Compulsory Revisions
None

Minor Essential Revisions

1: A reference should be given for the LURIC study (on page 6)
2: Table 1 and 2 are missing some information. Mean values are most likely given together with SD’s, but this should be clarified also for alcohol consumption and cholesterol levels.

Discretionary Revisions

If cohort size allows for sufficient power, a subgroup analysis of fatal versus non-fatal AMI would be of interest.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
