Reviewer's report

Title: Mild forms of hypophosphatasia mostly result from dominant negative effect of severe alleles or from compound heterozygosity for severe and moderate alleles

Version: 2 Date: 20 March 2009

Reviewer: kimimitsu oda

Reviewer's report:

All the questions posed by me are well defined in this revised manuscript.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I declare that I have no competing interests.
